**Using Ride with GPS on your tour allows you to access turn by turn voice navigation, detailed maps, and daily itinerary information entirely offline.**
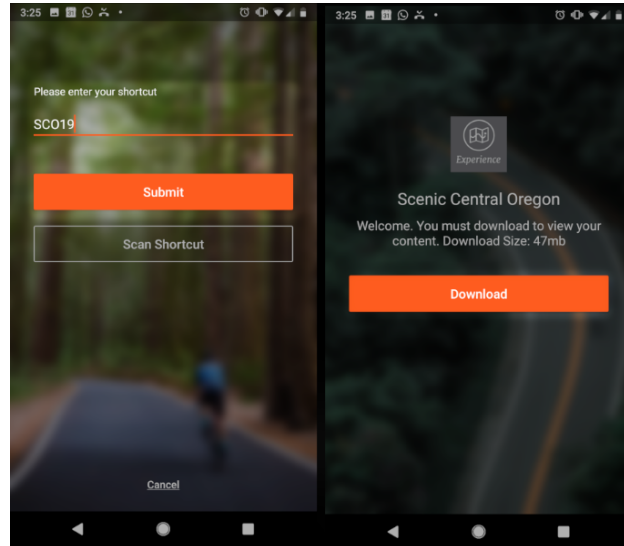

STEP ONE: Downloading app and tour package

1. Go to the Google Play or App Store and download the **Ride with GPS** app.
2. Tap the **Open Shortcut** button in the lower left corner.

3. Enter the code provided and tap **Submit**.

4. Tap **Download** to save your tour package to your phone (this download can take up to a minute or more).

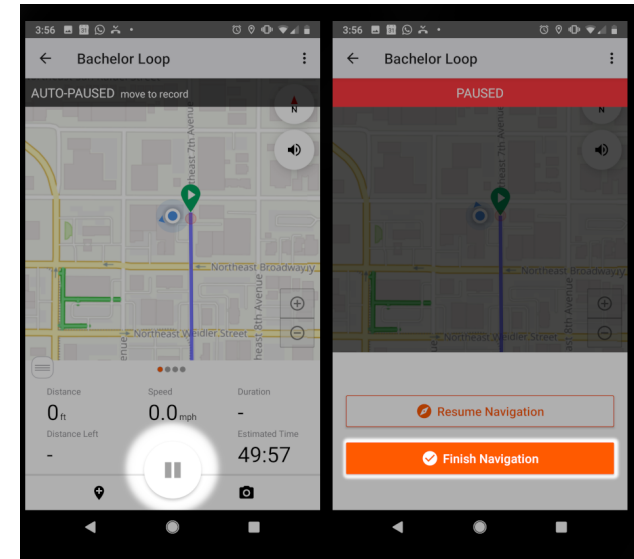

STEP TWO: Accessing your content

1. Once you have downloaded your content, you will be taken to your tour home page where you can access all your routes and itinerary information.
2. To start navigation, tap **View Routes**.
3. Tap the route from the list then tap the **Navigate** button.
4. To access your guide content, from the home page scroll to the bottom and tap the section you'd like to view information for.

STEP THREE: Finishing Navigation

1. When finished riding and you want to end navigation, **press and hold the pause button**
2. Tap **Finish Navigation**
3. This will drop you back on your tour homepage ready to start the next day.

CONSERVING BATTERY & DATA
- Use Airplane Mode if possible
- Keep your screen off as much as possible
- Turn down the screen brightness
- Ride with GPS uses no data when all content is made available for offline use and you are in airplane mode

OFF COURSE
- Off-course chimes repeat every 2 minutes and stops when you are back on the route.
- RWGPS strictly follows the cue sheet and will NOT re-route you like a car GPS.
- The off-course banner will tell you the direction to head to get back on course.

KILOMETERS
- Use metric units: in app Settings > select Navigation > Turn on "Use Metric Units".

Ride with GPS Support

- For complete steps and other helpful information, please see our website: https://ridewithgps.com/help/mobile-app-experiences/
- Contact Ride with GPS with any questions at info@ridewithgps.com. Include your tour name and details for the quickest response.
